

- All relationships are inner joins.
- Rounded corners denote dependant tables.
- Arrows represent the many side of one-to-many relationships.

The Species / Run query selections pull data from 8 different distribution tables (contained in ArcView .shp files), one for each resident species. For example, spcs 0998.shp contains data for Rainbow Trout. The .shp files which may be used for the resident fish distribution maps are: Spcs0998.shp, Spcs1098.shp, Spcs1198.shp, Spcs1298.shp, Spcs1498.shp, Spcs2198.shp, Spcs2398.shp, Spcs3398.shp.
